

SKYWASH BY CALLAHEAD

CALLAHEAD's SKYWASH commercial sink was invented and designed by Charles W. Howard, CALLAHEAD's President and CEO. Mr. Howard is recognized as an award-winning builder and designer responsible for countless innovations at CALLAHEAD. The SKYWASH is specifically engineered for commercial environments with access to running water and an established sewer, cesspool, or holding tank. The SKYWASH features a stainless-steel sink equipped with both hot and cold running water. It is designed for use across a wide range of commercial environments, including skyscrapers, high-rise buildings, ships, piers, barges, warehouses, parks, power plants, industrial sites, restaurants, nightclubs, and sewer facilities, provided a source of domestic or tank water is available. CALLAHEAD's SKYWASH is especially valued by work crews in high-rise settings for its ease of relocation between floors, enhancing operational flexibility and convenience.

The SKYWASH is designed with a streamlined structure and equipped with wheels to enable movement through elevators, hallways, gates, and alleys. The die-cast wheels include secure locking mechanisms for safety. A lifting hoist can be attached to the SKYWASH for transportation by crane or similar equipment, allowing movement in multiple directions, such as up, down, or across to locations like barges or ships or on multiple floors in high rise buildings. The enclosed sink is made entirely from commercial marine-grade plastic, stainless steel, and aluminum, and is built to withstand demanding job-site conditions and various weather environments.

CALLAHEAD's SKYWASH is a product designed, manufactured, and rented exclusively by CALLAHEAD. It comes in ten color options: Blue, Green, Orange, Brown, Yellow, Black, Indigo, Arctic White, Dolphin Gray, and Red, to coordinate with various jobsite locations. The SKYWASH is intended for commercial sites with accessible water and sewer connections. Its construction uses marine plastic, stainless steel, and aluminum to minimize rust, corrosion, mold, and algae. The aluminum-clad exterior provides structural support, and the design addresses wind resistance to help prevent tipping.

Additionally, the roof is made from marine-grade plastic with a significant pitch to help reduce rainwater leakage.

The SKYWASH is equipped with a spring-loaded door engineered to remain securely closed at all times. Featuring both interior and exterior handles, the unit can be locked using a padlock supplied by CALLAHEAD to prevent unauthorized access. The door is intentionally shortened by 4 inches at both the top and bottom to improve airflow and ventilation. A stainless pressed CALLAHEAD sign adorns the door's exterior, reflecting the brand's commitment to excellence in commercial sink solutions.

Inside the SKYWASH is a 24" x 24" stainless steel standing sink with a height of 36" and features an 8" chrome faucet. The sink includes an 8" stainless steel backsplash. A chrome-plated brass rear exit p-trap is compatible with existing plumbing. The water inlet supply uses a standard flush mount for a garden hose. The 2.5-gallon, 110-volt, 1500-watt, 15-amp water heater measures 13"L x 11"W x 10"H and supplies hot water as needed.

A wall-mounted soap dispenser is available for installation within the SKYWASH upon request. The unit features smooth, frameless interior walls to allow for unobstructed movement. Flooring is fitted with aluminum grip plates to enhance safety and minimize the risk of slipping. An LED bulkhead light (6.2W, 500K) provides sufficient lighting inside the unit. This lighting system operates on a standard 110-volt outdoor extension cord, which may be connected via an accessible port on the side of the unit.

The SKYWASH is designed for use in locations with existing sewers, cesspools, holding tanks, and on-site water sources. The rear exterior of the unit features a 3-inch discharge outlet for straightforward grey water connection to a sewer, cesspool, or holding tank. A standard heavy-duty garden hose may be attached to the SKYWASH's external ¾" hose bib to supply fresh water to the sink. The wheels include 3-inch lockable front casters with 360-degree pivot capability and 3-inch fixed wheels at the rear. The wheels are semi-recessed to help prevent damage. After moving the SKYWASH to its location, the wheels can be locked to secure the unit in place.

The SKYWASH unit can be transported to the required location utilizing equipment such as cranes, boom trucks, bulldozers, forklifts, or comparable machinery. Its exterior aluminum-clad framing is engineered for straightforward lifting with chains, straps, or cables. The unit is suitable for building construction or aboard ships and barges, demonstrating its versatility across diverse environments. CALLAHEAD's SKYWASH presents an effective solution for work crews operating on multiple floors by providing a commercial grade sink accessible at any level. This arrangement minimizes downtime associated with traveling to remote sinks, thereby enhancing operational efficiency and profitability. Additionally, the SKYWASH may be attached to a crane for convenient relocation, and its 31-inch width allows for seamless navigation through doorways, elevators, alleys, and corridors.

The SKYWASH offers same day or next-day delivery across New York City's five boroughs of Manhattan, Brooklyn, Queens, Staten Island, the Bronx and throughout Westchester, Nassau, and Suffolk Counties on Long Island up to Montauk Point.

The SKYWASH, designed by Charles W. Howard and manufactured by CALLAHEAD, is an innovative stainless steel sink specifically designed for commercial applications. This unit provides a robust solution for high-rise construction sites or commercial facilities that have access to water, sewer, cesspool, or holding tank systems. The SKYWASH enables construction teams to maintain hygiene standards by offering reliable access to clean water for handwashing after handling hazardous materials, as well as for cleaning tools and equipment on site.

SKYWASH DESIGN SPECIFICATIONS & FEATURES:

Construction: commercial marine grade plastic with stainless steel fasteners and aluminum welded framework • **Color Options Available:** Blue, Green, Orange, Brown, Yellow, Black, Indigo, Arctic White, Dolphin Gray, and Red • **Height:** 83" • **Width:** 31" • **Depth:** 48" • **Interior Dimensions:** 47"D x 28"W x 78"H • **Door Opening:** 22"W x 78"W • The door has stainless steel door pulls on the interior and exterior, stainless steel barrel bolt latch, and automatic spring door close • Door's exterior has two stainless steel padlock hasps to lock on the outside • **Four diecast wheels:** Front two wheels are 3" lockable with a 360-degree pivot and back two wheels are 3" fixed. • **Flooring:** Aluminum framed starboard with four 1 1/2" aluminum non-slip strips • **Stainless Steel Sink:** 24" x 24" Deep Standing Sink 36" High with 8" Chrome Faucet with 8" Stainless Steel backsplash. • **Standing flush mount** for garden hose to supply water to the sink • **2.5 Gallon 110 Volt hot water heater** 1500 watts with 15 amp measuring 13"L x 11"W x 10"H • 3" rubber coping for easy connection of a PVC or hose for discharge • **External 3/4" hose bib connection** with hinged cover for water hook-up with heavy-duty garden hose • **Lighting:** 6.2-Watt 500K LED bulkhead light connects to an outdoor standard 110-Volt weather resistant extension cord via the AC port on the side of the unit. • **Stainless pressed CALLAHEAD specialty designed signage** • **Generous roof pitch** to remove water as fast as possible to prevent roof leaks

SKYWASH OPTIONAL ACCESSORIES TO RENT:

For added convenience, we are proud to offer the below list of optional accessory items with your SKYWASH rental.

Soap Dispenser can be installed inside the SKYWASH and is filled with 800 ml of antibacterial soap that kills 99.9% of germs and bacteria that can cause serious illness. Requirements and health benefits of handwashing in accordance with The Center for Disease Control (CDC), The Occupational Safety and Health Act (OSHA) and The Center for Construction Research and Training (CPWR) conclude that proper hand hygiene is an essential part of preventing illness. The Soap Dispenser provides approximately 1300 uses and can be refilled as needed by CALLAHEAD. • **Antiseptic Dispenser** can be installed inside your SKYWASH filled with our waterless hand sanitizer. Our waterless hand sanitizer kills 99.9% of germs and bacteria and meets OSHA and Health Department requirements. The antiseptic dispenser is perfect for sanitary protection for yourself and others. The antiseptic dispenser supplies approximately 900 - 1300 uses and refilled when needed by CALLAHEAD with its rental. • **GoJo Hand Cleaning Dispenser** can be installed inside the SKYWASH and filled with the #1 heavy duty GoJo hand cleaner. GoJo hand cleaner is popular among auto mechanics for its ability to easily break down grease and grime. GoJo Hand Cleaner has become popular with construction workers and contractors to remove acids, cement and other solvents from hands. • **Paper Towel Dispenser** can be installed inside the SKYWASH filled with 250 sheets of double fold paper towels. The CALLAHEAD Paper Towel Dispenser is commonly rented with the Soap Dispenser, Antiseptic Dispenser or Go Jo Hand Cleaner to clean off any dirt or solvents that are otherwise hard to remove.

IDEALLY SUITED FOR THE FOLLOWING:

Construction locations with running water and a sewer, cesspool, or holding tank • Skyscraper construction and renovations (with or without elevators) • Building construction and renovations (with or without elevators) • Barges, ships, and piers • Industrial plants • ConEd plants • Electrical plants • Power plants • Manufacturing plants • Sewer plants • Sewer construction • Office building bathroom renovations • Restaurants, bars, nightclubs or other commercial bathroom renovations • High-rise building and skyscraper construction and contracting sites • Any location with narrow doorways or gates with water, and sewer, cesspool or holding tanks • Any location with narrow alleys with access to water, sewer, cesspool or holding tanks

CALLAHEAD has been an internationally recognized leader in portable sanitation solutions since 1976, under the direction of Charles W. Howard. Starting in Queens New York, CALLAHEAD provides services exclusively within the New York area. Our extensive industry experience guarantees exceptional service standards, offering innovative products that are both designed and manufactured by CALLAHEAD and unavailable anywhere else. CALLAHEAD is recognized as the leading provider in the industry with countless innovations and unmatched hospital grade sanitary service.
